

ALUKO 
YOU DREAM. WE BUILD

*Your Window to
Feel the Magic.*

About Us

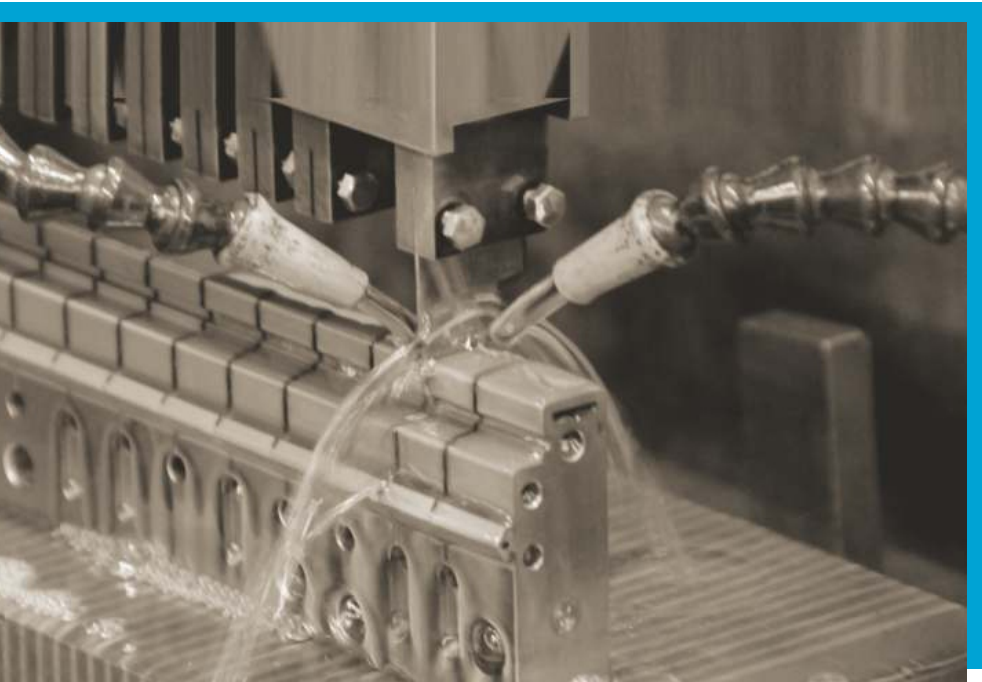

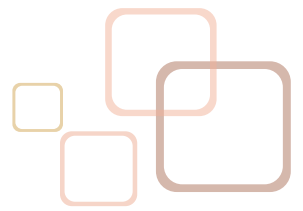

About **ALUKO Windoor Pvt. Ltd.**

In classic terms, fenestration refers to the design, construction, and placement of windows and doors in a building. Over the years, the term fenestration has opened the ways for both indoor and outdoor windows, doors, skylights, and any other designed to transmit light from one space to another. ALUKO Windoor Pvt. Ltd. is one renowned name that thrives to be a name of 'change' in the Fenestration industry with the infusion of the latest technologies. We offer high-quality window and door systems in collaboration with the international player for technology-based products.

We came into existence in 2018. The company was launched with an extended thought to bring a revolution in the manufacturing process using German Technology for effective, visually appealing and eco-friendly products. ALUKO Windoor Pvt. Ltd.. The motive was to provide exceptional and long-lasting products with high-end functionality for all fenestration systems.

The manufacturing process for all our products follows an irresistible set of standards and conforms to the most recent national and international quality standards. With the same thought, we have marched forward and accomplished both private and government projects for different sectors like hospitality, residential, commercial and others in a very less time span. The role we delve into in the fenestration world is much more than just manufacturing the fenestration systems i.e. bringing a change in the fenestration industry with the latest technology. Already well-known for its durability and rigidity, we strive to strengthen in all the ranges we come up with.

Excellence

Services

At ALUKO Window Pvt. Ltd.,
we believe in making every interaction with our clients as pleasurable and hassle free as possible.
The superior quality of our products speaks for themselves.

uPVC Doors

ALUKO Window Pvt. Ltd. doors are a perfect way to add charm and beauty to your home. They would inevitably keep the ambiance warm and serene. Our doors are maintenance free and durable; they are bound to not create a fuss for years.

uPVC doors are the most viable choice in today's time considering the weather and lifestyle in which we all are living. The features of uPVC doors in India keep you safe from dust, noise, rainfall, strong winds, etc. It requires low maintenance long life cycle and is energy efficient. Our ALUKO Window Pvt. Ltd. uPVC doors have a wide range of varieties that you can choose according to enhance the look and feel of your home interiors.

Sliding Windows

ALUKO Window Pvt. Ltd.'s exquisite collection of sliding windows adds panache to your homes. Crafted and designed in contemporary styles to complement your desires and taste, the sliding windows from ALUKO Window Pvt. Ltd. can be the most elegant choice for your home décor. With enhanced features including simplicity, architectural enrichment, and easy to use, sliding windows are made by keeping different ideas in mind to cater different needs of different customers. They are a great alternative for limited spaces because they slide horizontally into the grooves behind the fixed panes. These types of windows are great choices for other restricted spaces like interior partitions, cubicles and balconies. In uPVC sliding windows, two or more frames, slide horizontally on tracks to the left or the right. The windows are slightly raised above the track for smooth slide and also preventing dust from collecting down in the track. uPVC Sliding windows are ideal for homes that require space-economy.

Visionary

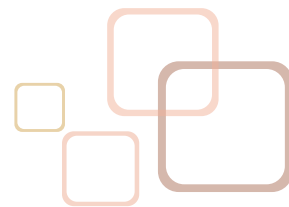

A Foundation for Futuristic Fenestration

Doors and Windows have undergone a sea of changes in the modern buildings. Universally, architects and builders have acknowledged that uPVC Doors & Windows are of engineered quality and can be customized to any size. Their aesthetical good looks, their ease of installation and their undisputable long term benefits have convinced architects, builders and consumers alike. ALUKO Windoor Pvt. Ltd. frames can comfortably house bigger sheets of glass due to their inherent deeper glazing rebates which are a stringent requirement for combating India's higher wind pressures, a wide range of glass thickness. Available in a varied range of contemporary styles and designs in white and natural wood finishes. ALUKO Systems render Strength, Beauty and Convenience to doors and windows of any size.

Innovative

Casement Doors

ALUKO Single or Double Casement Doors are suitable for opening-in and opening-out mode. can be used as main entrance door or as ancillary door leading onto corridors. Patios or balconies. Casement doors are available in 60 mm or 112 mm profile depth and can be manufactured as stand-alone items or part of a screen incorporating fan lights and/or side lights. Double doors also known as French doors can be used as an alternative to sliding Patio doors. especially. when a clear wide opening is being desired.

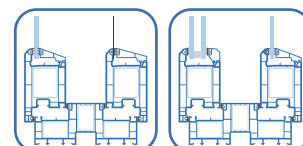

- Contemporary modern soft line appearance.
- 10 mm sash overlap for enhanced performance.
- Internal glazing options from 4 mm single to 36 mm double.
- Choice of numerous multi-point locking devices including full perimeter locking
- Threshold-less or Aluminum low threshold
- Choice of hinge types including concealed (invisible) hinges

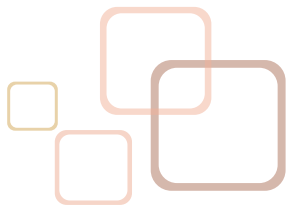

TwinSash Doors

ALUKO TwinSash Doors are probably the most ingenious door invented in India comprising two independently operated door sashes. one sash opening-out for mosquito screen and one sash opening-in for glazing. However. some parts of India may only require one sash equipped with mosquito screen whilst the second sash houses fixed or adjustable louvers. TwinSash doors can utilize ALUKO two dedicated. door sashes and wide range of locking devices. For today's requirement. the ultimate TwinSash door comprises an external mosquito screen with a high performance double glazing unit incorporating blinds.

- 152 mm outer frame depth with 56 mm available space between sashes
- 10 mm sash overlap for enhanced performance
- Internal glazing option from 4 mm single to 36 mm double
- Possibility to combine mosquito screen. panel. louvers and glass within one unit
- Choice of locking devices and hinge types including concealed (invisible) hinges
- Threshold-less

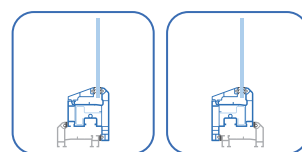

Creative

Balcony Doors

ALUKO Balcony Doors are intended to provide more glass area due to an overall, slimmer frame sight line and are available as either single or double doors (French doors), opening-in or opening-out, and are offered with one operating handle by design, which is positioned inside. A special handle and a concealed snap-in device enables a temporary closing of the door when outside. Balcony doors can be stand-alone items, manufactured with fanlights and and/or sidelights, or integrated into complete curtain walling screens.

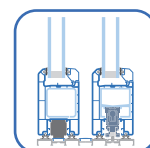

- Contemporary modern Softline appearance
- 10 mm sash overlap for enhanced performance
- Internal glazing option from 4 mm single to 36 mm double
- Choice of numerous multi-point locking devices including full perimeter locking
- Threshold-less or Aluminum low threshold
- Choice of hinge types including concealed (invisible) hinges

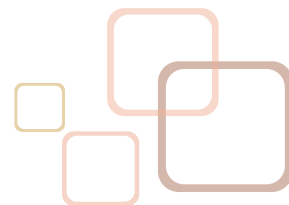

Lift N Slide Doors

ALUKO the leading fenestration brand in the country, has given innovative fillip to traditional sliding and the result is – Lift n Slide Doors which are designed for larger openings for unobstructed views. By rotating the handle 180° the door fully lifts off its seals. ALUKO hallmark engineering precision ensures ease of function in both operations, that is, sliding and lifting.

- Easy handling due to perfectly aligned system technology.
- Double compression seals protect against draught, dust & water
- Internal glazing options from 4 mm single to 36 mm triple.
- Heavy duty tandem rollers for smooth operation.
- Secure hardware fitting into steel reinforcements as standard.
- Energy saving due to excellent thermal property

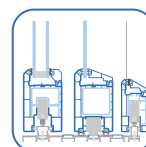

Ergonomical

Heavy Duty Patio Doors

Modern frame apertures are getting bigger and the demand for more glass and less vertical divisions by frame members is increasing. ALUKO Heavy Duty Patio Doors can comply with those new challenges with its 2- pane version that can be manufactured up to 5.8 meters wide and up to 3.0 meters tall. accepting a maximum sash weight of 300 kg. The overall outer frame depth of 142 mm housing two 62 mm deep sashes is perfectly suited for modern straight through apertures. The effortless operation of the heavy sashes achieved by using tandem rollers with a high weight carrying capacity. ALUKO solid Aluminum threshold construction and a good gripping D-handle. anchored into the concealed sash steel.

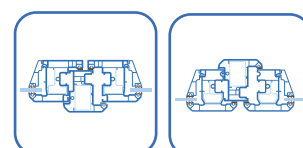

- Available options 2-track (142 mm depth). 3-track (222 mm depth) and 4-track (302 mm)
- Unique Aluminum low threshold option for 2-track. 3-track and 4-track
- Internal glazing option from 4 mm single to 36 mm double
- Aluminum interlock for added rigidity equipped with double seal
- Heavy-duty tandem roller and multi-point lock as standard
- Optional mosquito screen and/or centre-pane/4-panel adapter

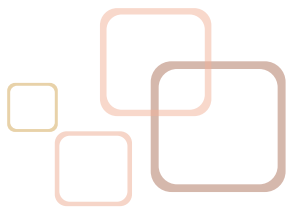

French Doors

ALUKO French Doors. also known as double doors or double windows. are a pair of glass doors usually opening from the back of a house into its garden or onto its balcony. This concept of opening both sashes fully without seeing a centre obstruction has influenced French architecture since the 17th century. The whole grace and dignity of many European buildings was based on this majestic design principle. Modern fenestration adopted the uniqueness of French doors and French windows. mainly upgrading the design for high performance glazing and sophisticated locking devices whilst retaining the original character.

- ALUKO casement sashes are suitable for French doors and French windows
- Available in opening-out and open-in mode
- Internal glazing option from 4 mm single to 36 mm double
- Choice of numerous multi-point locking devices including full perimeter locking
- French doors are available threshold-less or with Aluminum low threshold
- Choice of hinge types including concealed (invisible) hinges

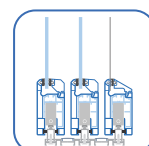

Unique

Low Threshold Doors

High performance in terms of air and water tightness, dust, insects, sound reduction requires sealing of the full sash perimeter. Any low threshold or threshold-less arrangement will compromise the performance aim but traditional living habits combined with ergonomics are today's overriding factors for fenestration.

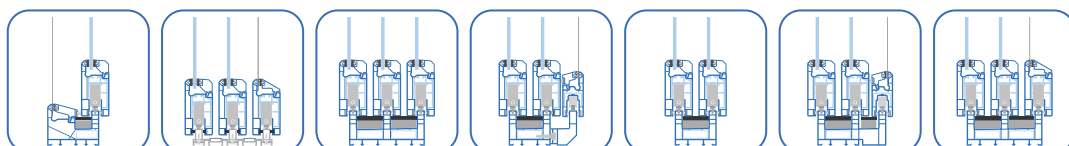

ALUKO is offering, wherever possible, Aluminum low threshold solutions or provide suggestions on how to prepare ground levels to hide the unwanted, high frame up stand associated with Fold & Slide Patio Doors and Tilt & Slide Patio Doors. ALUKO has chosen purposely Aluminum thresholds with silver anodized finish to provide a hardwearing foundation for years of product durability.

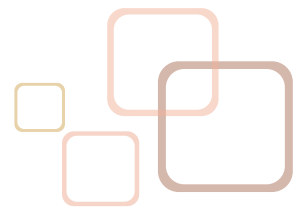

Sliding Doors

ALUKO Sliding Doors range covering frame depths from 62mm to 142mm and is designed to provide the maximum flexibility for fabricators and clients alike. Based on a range of sections, it offers full flexibility from single sliding to multiple sliding openers, clip on or integrated sections for fly screen and a range of section sizes covering small and large openings.

- 1, 2, 3 and 4 track sliding, Patio door and fly screen options
- 10 mm sash overlap for enhanced performance
- Internal glazing options from 4 mm single to 22 mm double
- Choice of single or multi – point locking devices
- Hardware components fastened into steel or walls or uPVC
- Secure hardware fitting into steel reinforcements as standard
